Products Derived from Innovation

Semiconductor Production Equipment
Tokyo Electron develops and manufactures a broad range of superior semiconductor production equipment, and complements its original lineup by distributing high-value-added products from other suppliers.

• Original Products
  Coater/Developer
  Spin-on Dielectric Coater
  Plasma Etch System
  Thermal Processing System
  Single Wafer Rapid Thermal Furnace
  Single Wafer CVD System
  Plasma Process System
  PVD System
  Cleaning System
  Scrubber System
  Fully Automatic Wafer Prober
  Optical Digital Profilometry System

• Distributed Products
  Cu ECMD System (NuTool Inc.)
  FIB System (FEI Company)
  Film Metrology Tool (Rudolph Technologies, Inc.)
  Yield Management Software (Yield Dynamics, Inc.)
  X-ray Diffraction Measurement Equipment (Bede Scientific Instruments Ltd.)

Flat Panel Display (FPD) Production Equipment*
Leveraging the technology and expertise accumulated from its semiconductor production equipment business, Tokyo Electron has created a strong lineup of leading-edge FPD production equipment.

• FPD Coater/Developer
• FPD Plasma Etch/Ash System

*Formerly called LCD Production Equipment
In order to fulfill its goal of providing solutions tailored to user needs, Tokyo Electron distributes storage area network and Internet related products for broadband solutions to offer comprehensive system solutions.

- Internet solutions
- Network security solutions
- SAN solutions
- Video Network solutions
- Aerospace products

Tokyo Electron selects and offers the world’s best products from leading suppliers. With a full product lineup and flexible technical support, the Company provides total solutions to meet diversified user needs.

Operations are handled by subsidiary Tokyo Electron Device Ltd.

- Semiconductor products
- Board computer products
- Software
- Other electronic components

In addition to the sales of our three divisions, others sales contributed 0.3 percent of net sales.
